🌐 Neithal Prince

Profile

Motivated and detail-oriented Computer Science Engineering student with hands-on experience in full-stack development. Strong foundation in programming, web technologies, and problem-solving. Passionate about building scalable software solutions and exploring innovations in AI, ML. Quick learner and effective team player with a focus on delivering impactful results.

Experience

AI & ML Intern

Dec 25 – Jan 26

IBM SkillsBuild, Remote

Successfully completed a 4-week internship focused on AI/ML in collaboration with ASAP Kerala & Edunet Foundation.

Mastered ML workflows, AI system concepts, and data processing. Gained practical exposure through IBM SkillsBuild learning modules.

SDE Intern

Dec 25 – Jan 26

Algon Solutions Pvt. Ltd., Kochi

Optimized web applications and gained exposure to agile methodologies. Collaborated with developers to debug and enhance system performance. Gained expertise in scalable architecture design patterns.

Skills

Languages& Databases: Python, C , JavaScript, FastAPI, YOLOv8, MySQL, MongoDB

Frameworks: React, Node.js, Express.js, Stream lit Tools, Git, GitHub

Soft Skills: Critical Thinking, Problem Solving, Effective Communication, Teamwork

Education

UKF College of Engineering, Paripally, Kollam

2022-2026

B.Tech in Computer Science and Engineering

CGPA:7.1

Projects

Point Supervised Yolov8 (PS-YOLO) (2026)

Developed a real-time crowd counting and tracking system using YOLOv8 and BoT-SORT for high-speed inference. Reduced annotation costs by converting point-supervised annotations into pseudo-ground-truth bounding boxes, enabling detection-based model training without manual box labeling. Deployed the final system as a Flask-based web application for practical monitoring of bidirectional crowd flow.

Smart Blood Donation Tracker (2025)

Built a MERN stack application to efficiently manage donor and recipient data. Designed and implemented modules for donor registration, recipient requests, and blood group matching to ensure quick and accurate data retrieval. Focused on user-friendly UI and optimized database queries to improve performance and reliability of the system.

DiagnoseAI - AI Health Diagnosis Web App (2026)

Developed a full stack predictive health application using Python and Streamlit for identifying potential conditions from natural language symptom descriptions.

AWARDS

First Prize, Best Project - TinkerHub HerHack Hackathon 3.0

2024

Grace Hopper Celebration India 2025 - Certificate of Participation

2025

LANGUAGES

Malayalam(Native) ,English (Fluent), Hindi (Conversational)
